Burnside Breechloading Carbines  
And Rifles The carbine used a  
special brass cartridge which was  
also invented by Burnside. This  
cartridge contained a bullet and  
powder, but no primer. Pressing the  
weapon's two trigger guards  
opened the breech block and  
allowed the user to insert a  
cartridge. When the trigger was  
pulled, the hammer struck a  
separate percussion cap and  
caused a spark; a hole in the base  
of the cartridge exposed the black  
powder to this spark. Burnside

The Burnside Carbine made use of the breech-loading concept. This allowed the operator the capability to reload his weapon from the rear of the gun body as oppose to jamming a cartridge and propellant down the muzzle (muzzle-loading) by way of a ramrod as was common in muskets. The carbine made use of two trigger guards which were pressed to open the breech block. The open breech block was now made ready to accept a fresh .54 cartridge. Burnside Carbine Breech-Loading Carbine Rifle The Burnside Carbine was an early breech

Where To Download Burnside Breechloading Carbines And Rifles A Collectors Guide To The loading carbine designed by former American serviceman Ambrose Burnside. The design was not, initially, popular when the Burnside was first patented in 1855, but would eventually see production figures enter the 100,000 mark by the end of the American Civil War. Though the muzzle-loading percussion cap rifle was the most numerous weapon, being standard issue for the Union and Confederate armies, many other firearms, ranging from the single-shot breech-loading Sharps and Burnside rifles to the Spencer and the Henry rifles, two of the world's first repeating rifles, were issued by the hundreds of thousands, mostly by the Union. The Civil War brought many advancements in firearms technology, most notably the widespread use of rifled

arms historian Ed Hull has produced

his latest 'Collector's Guide to

Firearms, ' and it is a most

compelling and complete study of

Civil War era Burnside Carbines and

Rifles. This author has studied these

unique breechloading firearms for

many decades now, and this

173-page book covers all

prototypes and production models,

related Burnside ammunition and

associated accoutrements. Burnside

Breechloading Carbines and Rifles :

Edward Hull ... The Burnside

carbines were based on designs by

Where To Download Burnside Breechloading

Carbines And Rifles A Collectors Guide To The

General Ambrose Burnside, famous

as the namesake of sideburns. His

carbine bested seventeen other

designs in the 1857 trials at West

Point and was selected as suitable

for rearming the U.S. cavalry.

Unfortunately for Burnside, the

contract was broken due to

allegedly corrupt officials, and he

was forced to sell his assets,

including his patents, before the

carbines turned a profit.
