Descartes Error Emotion Reason And "Descartes' Error" is a "straw man", since the idea of a disembodied "soul" is, to say the least, not taken seriously in modern scientific circles. What is missing from this book is the realization that the "self", the source of free will and the decisions we make is not to be found exclusively in our heads. Descartes' Error: Emotion, Reason and the Human Brain ... Descartes' Error: Emotion, Reason, and the Human Brain is a 1994 book by neurologist António Damásio, in part a treatment of the mind/body dualism question. Damásio presents the "somatic marker hypothesis", a proposed mechanism

by which emotions guide behavior and decision-making, and positing that rationality requires emotional input. He argues that René Descartes' "error" was the dualist separation of mind and body, rationality and emotion. Descartes' Error - Wikipedia In Descartes' Error: Emotion, Reason, and the Human Brain, neuroscientist Antonio Damasio provides a compelling rejection of Cartesian dualism from the perspective of modern neurobiology. The author's contention, epitomised by his somatic marker hypothesis, overturns the conventional neuroscience paradigm that feelings have little, if any, constructive role in decision-making; on the contrary, his hypothesis argues that emotions are as important as attention and memory when it comes to making the right choices (pages 158-159, 166, 172,

and 175). Descartes' Error – The Doctors Bookshelf The body is a great reason, a plurality with one sense, a war and a peace, a herd and a shepherd. An instrument of your body is also your little reason, my brother, which you call "spirit"--a little instrument and toy of your great reason. . . .
