This textbook is intended to be used in a lecture course for college students majoring in the Earth Sciences. Planetary Science provides an opportunity for these students to apply a wide range of

subject matter pertaining to the Earth to the study of other planets of the solar system and their principal satellites. Introduction to Planetary Science | SpringerLink Planetary science (rarely planetology) is the scientific study of planets (including Earth), moons, and planetary systems, in particular those of the Solar System and the processes that form them. It studies objects ranging in size from micrometeoroids to gas giants, aiming to determine their composition, dynamics, formation, interrelations and history. An Introduction to Planetary Science - Planetary Sciences ... An Introduction to Mars. Image of Mars. Credit: Smithsonian. Mars is the fourth planet from the Sun and the second smallest planet in the Solar System. Named

after the Roman god of war, it is often described as the “Red Planet”, as the iron oxide prevalent on its surface gives it a reddish appearance. Mars is a terrestrial planet with a thin atmosphere, having surface features reminiscent both of the impact craters of the Moon and the volcanoes, valleys, deserts, and polar ice caps of Earth.
