Learn vocabulary, terms, and more with flashcards, games, and other study tools. lab 29: reflex arc and reflexes Flashcards | Quizlet Abnormal Biceps Jerk Reflex: Exaggerated or absent reflexes are used as clues to the location of neurological disease. Normal Bicep

Jerk Reflex Biceps reflex is a reflex test that examines the function of the C5 reflex arc and the C6 reflex arc. Muscles and Reflexes Lab - SCIENTIST CINDY The other option is to use this sensory information to initiate a pre-programmed reflex. A reflex is an unlearned, rapid, involuntary and predictable response. A reflex arc is a neural pathway involved in a reflex. The reflex arc consists of 5 components: 1. sensory receptor. 2. sensory neuron. 3. integration center. 4. motor neuron. 5 ... Reflexes | Anatomy and Physiology I The Achilles reflex (calcaneal reflex or ankle-jerk reflex) is a stretch reflex that assesses the nervous tissue between (and including) the first two sacral segments. It can be elicited by sharply tapping the calcaneal tendon (just above the ankle) with the base of a reflex mallet (no shoes or socks). Repeat with the other limb. LAB: Nerve Reflexes Key Points. Reflexes, or reflex actions, are involuntary, almost instantaneous movements in response to a specific stimulus. Reflex arcs that contain only two neurons, a sensory and a motor neuron, are considered monosynaptic. Examples of monosynaptic reflex arcs in humans include the patellar reflex and the Achilles reflex. Reflexes | Boundless Anatomy and Physiology The knee reflex arc is a spinal reflex, and the circuit is drawn above. This picture shows how the sensory (afferent) neuron sends information through the dorsal root ganglion into the spinal cord; where the signal splits into two different paths. The first is the motor neuron (efferent) leading back to the quadriceps. Experiment: How Fast Your Brain Reacts To Stimuli reflex arcs that involve sensory receptors, sensory nerve neurons, motor neurons, and effector all on the same side of the body contralateral arc reflex arcs that involve

sensory receptors and neurons on one side of the body and motor neurons and effectors in the opposite side Nerves and Reflexes (Anatomy and Physiology Lab ... REFLEX ARC: Reflex arc is the nerve pathway involved in a reflex action, including at its simplest a sensory nerve and a motor nerve with a synapse between. Reflex arc consist of 1)Receptor or sensory organ, 2)Sensory neurine, 3)Reflex centre (brain or spinal cord), 4)Motor neurone and 5)Effector (muscle or gland). Q2. What is reflex action?
